### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-18 are allowed.

### ***Examiner's Statement of Reason for allowance***

The following is a statement of reasons for the indication of allowable subject matter:

The most relevant references are the *Pilipovic* and *Anile* references.

*Pilipovic* discloses a system ( and corresponding computer readable medium storing executable program instructions) for evaluating a price distribution or a risk distribution for a financial product or its derivatives, comprising: an initial value setter configured to input at least one of initial values of a price, a price change rate, and a price change direction for a financial product or its derivatives; an evaluation condition setter configured to input evaluation conditions including at least time steps and a number of trials; an analyzer configured to repeat simulation of price fluctuation using a Monte Carlo method to obtain a price distribution or a risk distribution; a velocity/direction distribution setter configured to input probability distributions of the price, the price change rate, and the price change direction for the financial product or its derivatives into the analyzer; a random number generator configured to provide a series of random numbers used in the analyzer; and an output unit configured to output analysis results of the analyzer (col. 2, lines 16-29; col. 20, lines 1-15; col. 4, lines 8-20; col. 3, lines 14-29; col. 2, lines 10-30; col. 2, lines 10-15; Figure 5).

*Anile* discloses solving Boltzmann equation using Monte Carlo distribution (pg 1 of 10, second paragraph).

*Pilipovic and Anile* fail to teach a price and risk evaluation system for evaluating a price distribution or risk distribution for a financial product or its derivatives comprising an output unit configured to output analysis of the Boltzmann model analyzer

wherein

the Boltzmann model analyzer includes a sampling unit, a price-fluctuation simulation unit, and a probability density calculation unit, and

the Boltzmann model analyzer, after receiving at least one of initial values of the price, the price change rate, and the price change direction for the financial product or its derivatives from the initial value setter, a sampling width from the sampling unit, at least necessitated one of probability-distributions of a price, a price change rate and a price change direction from the velocity/direction distribution setter, and the random number from the random number generator, repeats by the price-fluctuation simulation unit to simulate a price immediately after the sampling width, a price change rate immediately after the sampling width or a price change direction immediately after the sampling width from a price immediately before the sampling width, a price change rate immediately before the sampling width or a price change direction immediately before the sampling width based on the Boltzmann model using the Monte Carlo method within the range of the evaluation condition set by the evaluation condition setter, and integrates prices immediately after the sampling width, price change rates immediately after the

sampling width or price change directions immediately after the sampling width to obtain a probability density by the probability density calculation unit.

Updated searches revealed no references that disclosed the claimed invention, nor were any further references identified which could be reasonable combined with *Pilipovic and Anile*.

For this reason, claims 1 and 18 are deemed to be allowable over prior art of record and claims 2-17 are allowed by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
